

Tips 4 Free

September 2006

- Use clear silicone to mount isotopes, it offers them protection and does not dry with age and eventually crack the cylinder.
- If using Pop Up in tubs such as Hookers buy a plug hole drainer from B&Q and it fits in the bottom of the pot to keep baits out of any added dip getting water logged!
- Fox sea bait stops are excellent stops for stopping flying back leads coming back to far.
- Lake mapping is done easily by getting an aerial photograph of the lake and colour copying, you can then overlay, graph/tracing paper and a single measurement at the venue will give you a key to all required distances.
- Need a leak proof 5-litre water container that can be packed at the top of a rucksack (making carrying easier) buy a plastic petrol can, and they're available in black or green!
